SAMPLE HABIT APP

Sample Labs · Health & Fitness · App Store

40 /100

GROWTH SCORE

People who find you like you (4.6 stars), but too few find you, and the paywall loses most of those who do. Fix the paywall and the first screenshot before you buy more installs.

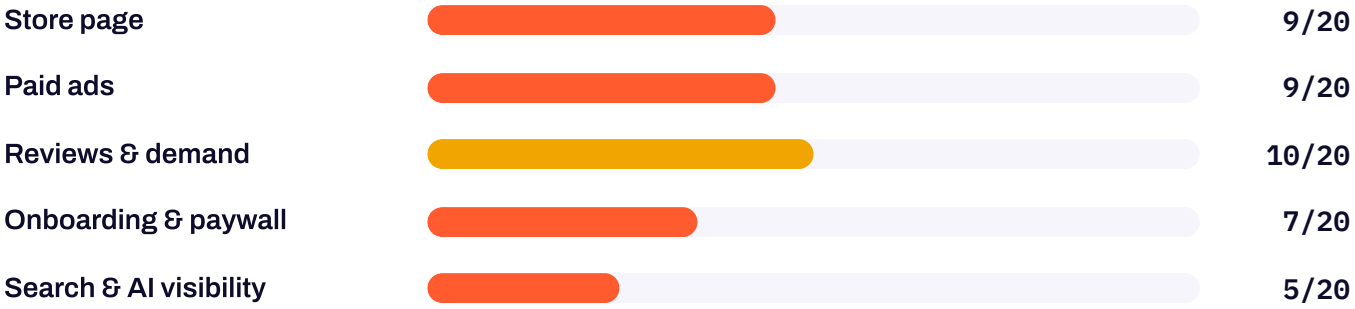

BIGGEST LEAK

Paywall

The paywall appears before the user has tracked a single habit, offers one plan with no trial, and the close button is hidden for 5 seconds.

SUMMARY

Top 3 fixes, ranked by impact on cost per paying user

1 **Move the paywall after the first habit and add a 7-day trial**

IMPACT: HIGH EFFORT: MEDIUM

Users who log one habit before they see a price are more likely to start a trial. This is the biggest leak.

2 **Rebuild screenshots 1–3 around the outcome and real reviews**

IMPACT: HIGH EFFORT: LOW

Most store visitors never scroll past the first screenshots. Today they see a settings screen.

3 **Test 15 new ads from the 5 angles above**

IMPACT: HIGH EFFORT: LOW

3 static ads can't find a winner. Competitors run 40–120.

How the score works: each area has 4–5 checks scored against what top apps in your category do. The total is points earned out of points possible. Every point is explained on the next pages.
